DETAILED ACTION

Response to Arguments

Applicant's arguments filed 05/24/2010 have been fully considered but they are not persuasive. Applicants made the following argument:

ARGUMENT :

Applicant respectfully disagrees. As best understood, the Horikiri reference discloses two separate and spaced-apart "C" character-like flat springs" which are not fixed and which do not overlap one another.

In response to argument above, it is not persuasive because Horikiri reference disclose spring element 14 rendered stable as a fixed on the field core 4, because the spring made a force to the coil on up direction and the same time the bolt 11 pressed the spring through the coil bracket (9) and insulator collar (12) on down direction to made the spring coil on stable position or placed so as to be firm as shown in figure 3.

Art Unit: 2834

/JOSE A GONZALEZ QUINONES/
Examiner, Art Unit 2834

/Karl I.E. Tamai/
Primary Examiner, Art Unit 2834
